Edgetech Instruments Announces New Sales Representative in the Gulf Coast & Mid-Western States

Edgetech Instruments Inc. is pleased to announce signing on Allesco, our new Manufacturers Representative, covering the Gulf Coast & Mid-Western States. Allesco will be handling Edgetech Instruments' dewpoint, humidity, and oxygen analyzers, as well as our 17025:2005 accredited calibration services.

Allesco represents the finest manufacturers of processing equipment, valves, and instrumentation. As a company, they are dedicated to providing quality solutions for your application needs. Vast experience, superior products and cost-effective solutions have been Allesco's formula for success for over 50 years — and remain cornerstones for their future growth. Throughout the Gulf Coast and Mid-Western States, customers turn to Allesco for exceptional service and performance.

In addition to component sales, Allesco offers System Solutions with Fabricated Skid Packages. They combine a wide array of products with technical expertise, project management, fabrication, and testing of complete systems. Their Technical Service and Calibration department supports all their products and offers field service, repairs, start up, and commissioning.
